Merging layers Layers in an image are stacked on top of each other. By default, layers are in a normal stacking order, left to right. However, some kinds of images, such as a layer of a rotated bevel and a layer of a sketch, can be adjusted to stack the layers in another order. To do this, select the layers and use the dialog box that appears, shown in Figure 13-9. **Figure 13-9:** The Merge Layers dialog box enables you to adjust the stacking order of layers in a multilayer image. To change a layer's stacking order, open the Layers dialog box by selecting Layer > Layers, or by pressing Ctrl+L. You can rearrange layers as many times as you like by pressing Ctrl+L and then clicking the down and right arrow keys.
