A major change to Assassin's Creed IV appears to be the inclusion of some of the most beloved characters from the world of Assassin's Creed in their own, unique, side-stories.

The major assumptions we made about Ezio's story are utterly wrong, a number of characters return, and the game setting is set in the East.

The first of what will be a strong line of Pirates games will hit stores in the form of Assassin's Creed Pirates in this summer for $59.99 on XBox 360, Playstation 3 and PC.

The first Assassin's Creed Pirates game is set to release this summer and early access for fans of the series means that they can play a first look at the game and it's content before the game's slated spring 2013 release.

You will play as Ratonhnhaké:ton, a young female Assassin, who is caught up in the growing rebellion against the Spanish regime in the Caribbean.

The game's gameplay will heavily draw on the Assassins creed lore, and will also see players fighting off the guards of the Spanish crown and helping their fellow pirates in the fight

Following that , we are going to place our Steam CRYENGINE SDK installer and a Steam login script to launch the installer. To save the files, I'd recommend another blank editor like the sublime text editor. Click "Windows" and then click "RMB + C". This will bring up the application folder where the files are located. Click the "File" menu > "Save As" and save the files to a location that you will be able to find later. At the C:\SteamApps\common\steam steam://urltoskin Copy the two.exe files to this folder. Click "Arrow down" to find the C:\SteamApps\common\steam\steamapps\common\Steam\steamapps\common\Steam\appcache\bin as this folder is automatically generated when installing with steam. You'll be able to access the SDK installer with the file trigger "**C:\SteamApps\common\steam\steamapps\common\Steam\appcache\bin\SteamInstaller.exe**". There are three files to be installed: SteamInstaller, steamui.dll, steamcmd_definitions.xml Unzip the SDK and copy the second half of the files to the C:\SteamApps\common\steam folder. At the C:\SteamApps\common\steam\steamapps\common\Steam\appcache\bin\steamapps\common\Steam\appcache\bin\SteamInstaller.exe SteamLaunchUISuite.js Copy this file to the C:\SteamApps\common\steam\steamapps\common\Steam\appcache\bin folder.
