Elden Ring Online features a story that is recounted in various ways by the characters who live in the game world. Players create a character and travel through a vast world. The way of the story is a direct result of the actions of the characters and the things they encounter on their journey. This game is a massive open world MMORPG featuring the “PvP” and “PVE” system. In “PvP”, players attack each other and the game world is constantly changing, and battles occur randomly all around. It is possible to enter specific PVP areas using a point system, and guilds can set up a structure as a base and manage resources. In “PVE”, players explore dungeons to progress the story. They are rewarded with gear through defeating monsters and can acquire plenty of items through various means, such as exploration, acquisition, and trade. Furthermore, they can achieve various changes to their appearance using various items. The worldwide leader in the world of RPGs, FINAL FANTASY, welcomes the new fantasy action RPG, Elden Ring Online, which will be released in the Americas, Asia, Europe and Oceania in August 2018. About Final Fantasy Developed by Square Enix, FINAL FANTASY is renowned worldwide as the pioneer of the RPG genre. This is the first time I've had a problem with issues with the game client. It says that I have a server issue and it also puts up a "connect to server" button. I can still play the game though. I've never had this issue. Once the server is fixed it says "Waiting for Respawn" and then I can play normally. When I quit the game I keep getting a pop up every 30 seconds to quit the game or keep it open. I've had this game for 6 years now and I have never seen that popup for any reason. Why are there so many people downloading this game? Didn't EA expect this many people to download this game? Are EA programmers working? More than 1,000 people waiting for Respawn Are they still downloading it? EA, how long are you going to keep releasing this game? Do you care that it's going to have over a 1000 people waiting for a Respawn? I love gaming - I love the graphics in this game - The gameplay is AWESOME!! - BUT, the fact that its over 1000 people downloading this game and that the servers are still full of people who aren't downloading it amazes me. I love playing but I have to wait for ten minutes for a server to open or wait and wait for a server that isn't full of people still downloading it. Every 10 seconds or so, it will ask me if I want to keep it open or quit. I keep it open every time. Oh well, I LOVE the game and it's really good, but I guess I have to say EA should have known that this many people would not be downloading it and that they would have a very long wait for it. This was a good start. Now they need to act quickly and fix the servers. Don't let people just download it from your website. Check their version or download it via the addon they released on the Origin site. Once the game has been released be sure to change the download link on that or your website as the old download is causing people to not play the game. This is game is the best RPG and if the servers can't keep up with the demand of it, then maybe people should think of other online gaming options. There are tons of things to do online. This game is fantastic. If you really like this game, get it on a disc. I've spent around 6 hours playing the bff6bb2d33
