Q: How can I fetch unique Twitter users for each user? I have a table with a column "followers" that contains the ids of all the users that the current user followed. This is a property of my User model. I would like to obtain a list of unique followers for each user. If the list were sorted ascending, I could use `User.find_each` which gives me a block of results per user. How can I use this method to get a unique list of the followers for each user?

A: You can use `enumerate_uniq` to do this: `User.find_each do |user| user.followers.uniq.find_each do |follower| # do something with the users and followers end end`

The government is considering amending foreign workers in the country. PHOTO: FILE New Delhi: The government is considering amending the Citizenship Act to end dual citizenship for people born in India. However, experts have said the exercise could prove to be a futile one unless the UK, which ended dual citizenship for its citizens in 1988, renews the process. The suggestion from the government comes on the heels of the Supreme Court staying the government's new citizenship law. The top court on Monday told the government to ensure that the government abides by the law and doesn't deny citizenship to people born in India. The top court also asked the government to explain how the government will identify Muslims who hold Indian citizenship and hold foreign passport. The government is considering amending the Citizenship Act, according to a senior government source. On Wednesday, a Parliamentary Standing Committee will meet to discuss amendments to Section 7 of the Citizenship Act and Section 3 of the Citizenship (Amendment) Act. This was the first time the government came out with the suggestion, said Amitabh Kant, former Chief Executive Officer and Managing Director of NITI Aayog. "We will give our inputs to the committee on Wednesday to think about the way ahead and then give it to the government. That is the first exercise we are doing. It is a very preliminary one," he said. Kant said the government can go ahead with the amendments. "It is not going to be any great problem to do it. Even

## **Features Key:**

CLASSES - v-Revision: Casual Class System. (Not included in the Early Access Beta) Detailed and easy to understand classes.

OPPORTUNITY (Deeper Awakening) - Hex, Resurrection, Align, God

PVP BETA - The process of unlocking is different... The true PVP part is not yet implemented, so I'll keep it simple.

Kept eye contact.

Q: C++: accessing nested tuples by reference I understand that a nested tuple (e.g. `{1, 2, 3}`) is an object but not an array, and can't be copied/assigned as such. I also understand that one could also get and assign a reference of the nested tuple. My question is: Are nested tuples to be used in declaration of the parent class so that the instance variables can be reference-assigned like this? Is there a better way to go about assigning the data members of a class? Is a `std::tuple` nested tuple a valid nested tuple, with respect to the C++03 standard?

A: 1) Are nested tuples to be used in declaration of the parent class so that the instance variables can be reference-assigned like this? No In general: no In spirit: Yes If a class derives from `std::tuple` and only overloads the manipulators `>` (`>` will not work) then it's legal. However, this should be used solely for demonstration purposes and not for "production ready code". 2) Is there a

"Forget about being hooked by going on a quest to level-up and finding treasure, the focus of the game is on the gaming experience itself." "The fact that the action-RPG genre, more or less, lacked variety in the past, that now gives Elven... "It was amazing to see the dark fantasy setting brought into the 'Action RPG' genre and implemented so well." Hi guys, Richard Harz here. I'm the writer and lead producer for Elden Ring. This is a game about a military reconnaissance team that descends into an Ancient Elven Temple to prevent the complete destruction of the world and then comes up against their enemies. My part of the team is an "action RPG" and the world our game is based on is one where action RPGs are king and the king is Elven. Over the past decade, I was heavily involved in the creation of several of the best action-RPGs in the past decade including The Witcher 3, Shadow of Mordor and Middle Earth: Shadow of Mordor, King's Bounty and more. The Elves are a people that are famous for their intricate hand-crafted works of art, hence our choice of setting in their ancient temple. Our big challenge was to balance a world that had been largely unexplored by games, with video games' concept of random encounters and the complexities of crafting a unique setting in the world. My first work on the game as lead writer and producer was writing the first three episodes of the main story. Each episode is a self-contained and totally unique tale that has something to it other than the main plot line, so the opening had to take into account that we needed a story that would be familiar but different from what has been done in other games. Later on when it came to writing the events that would be main-plot related, I knew that our game needed to have a distinct feel so that it'd be easy to distinguish from the games already on the market and to set itself apart from the others. I'm the first to admit that it is challenging to find that 'grace', to describe that new unique vibe of a game that stands out in a sea of similar-looking games. Our main protagonists are the souls of a young woman who died in a tragic accident, and an old man who defected to the Elven kingdom who is now haunted by the horrors he witnessed inside their ancient temple. The concept of exploring a fantasy world while simultaneously playing the role bff6bb2d33
