
Windows 7: I Installed Windows Updates KB980182 KB915597 BETTER

Shortly after the last successful log entry, three Windows updates were installed (automatic update enabled):. KB915597 def 1.79.702.0 & def 1.79.495.0 ... KB918607 (Security update for Framework 4.5.2). I also uninstalled this KB915597, but it did not return to the log. I would like to get the update from the Windows registry if I can find it. I have used the Malware search and removal tools, but they have not found anything that I can remove I would use search and remove Malware (using the Malware finder tool) to remove it from the Windows folder and registry, then reboot the computer with Windows Restore.

Windows 7: I Installed Windows Updates KB980182 KB915597

... With the windows7 update and hp-tuners compatibility I did a full restore(system restore) of win7 before the updates(KB980182;KB915597 ...). Now I want to install hp-tuner again, but I get an error message: Cannot find HP-Tuner CD-ROM in the CD-ROM partition. Please insert a functioning CD-ROM. And I need the drivers to get HP-Tuner working again, not just installing Win7 again. It didn't work even though I inserted a working HP-Tuner CD-ROM and even when it tried to restore/install using "system restore" it got the error again. dd2bc28256
